2 Tbsp	Greek Yogurt, plain, nonfat

CHEF'S NOTES

This recipe uses a food processor to turn vegetables into smaller pieces helping them blend right in with the meat. By reducing the amount of ground beef used, bulking the dish up with added vegetables, and using a moderate amount of low-fat dairy, we have reduced the calories, saturated fat, and sodium while increasing fiber. Serving this dish with a salad makes this a well-rounded dinner the whole family will love!

DIRECTIONS

1. Gather all necessary equipment and ingredients. Prepare all ingredients as described above.
2. Cut the onion, mushrooms, and zucchini into large chunks before adding them to a food processor and pulsing the vegetables about 3-4 times so the vegetables are chopped to the size of ground beef crumbles.
3. Heat a large saucepot over medium-high heat and add the oil once the pan is hot. Add the vegetables and cook for about 10 minutes. The vegetables will release a lot of moisture and it's important to cook them until most of the liquid has evaporated.
4. Add the ground beef and cook until no longer pink, about 2-4 minutes. Use a wooden spoon to break up the beef into small pieces as it cooks.

5. Add the tomato paste and seasonings, stirring to combine well and allowing the tomato paste to darken and the spices to toast, about 1 minute.
6. Add the stock, macaroni, and milk and stir to combine, making sure that the noodles are fully submerged in the liquid. Cover and reduce the heat to low, simmering for about 8 minutes, stirring occasionally so that the mixture doesn't burn and stick to the bottom.
7. Uncover and test the macaroni for doneness. If needed, continue to simmer, uncovered, until the pasta is tender.
8. Once pasta is cooked, remove from the heat and stir in the cheese and Greek Yogurt. Enjoy!
